Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Jamison, US Patent 4,811,818.

Jamison shows, in Figs. 1-4, a right rectangular parallelepiped lubricant stick comprising a first end for contacting a surface to be lubricated, a second end for contacting a spring 26 of a lubricant applicator, wherein the second end defines therein a channel (Fig. 4) for receiving at least a portion of the spring; wherein the stick having a first face opposite a second face.

3. Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Brinkerhoff, US Patent 282,837.

Brinkerhoff shows, in Figs. 5, 6, and 8, a lubricant stick and coiled constant force spring combination for lubricating a surface, the combination comprising a lubricant stick C having a channel for receiving a spring and hold the spring therewith and wherein the lubricant stick further having a first face and opposite a second face (both face being on the inside surface of the channel), wherein the channel is a generally right rectangular parallelepiped shaped extending through the first and second faces.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-6 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brinkerhoff.

Brinkerhoff shows, as discussed above in the rejection of claims 1-3 and 7-9, the lubricant stick having a rectangular shaped channel, but fails to show different shapes, such as semi-cylindrical, prismatic, or semi-hexagonal.

It would have been obvious to a person of ordinary skill in the art to modify the shape of the channel to such different shapes, since applicant has not disclosed that having the channel shaped in either semi-cylindrical, or prismatic, or semi-hexagonal solves any stated problem or is for any particular purpose and it appears that the stick would perform equally well with the channel formed at any shape as long as the channel is utilized to hold the spring in place.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lubricant stick with spring.
